WORK EXPERIENCE

Full-Time — Frontend Developer

Meem Development Feb 2024 - PRESENT

- Developed and maintained features for the Saudi ESports Academy web app, enhancing the functionality and user experience.
- Introduced a GitHub pull request template, facilitating a more efficient and standardized code review process.
- Implemented a user profile management feature, allowing users to update profile settings, interests, social media links, and passwords.
- Developed a course browsing feature, enabling users to filter and view available courses seamlessly.
- Created a dynamic form feature integrated with Strapi CMS, allowing users to enroll in courses by filling out fields generated dynamically.
- Upgraded the Angular version from v17 to v18 on May 23, 2024, ensuring the application benefits from the latest improvements and security updates.
- Improved application performance by removing ngx-translate localization in favor of Angular Internationalization (@angular/localize).
- Enhanced mobile performance: Improved mobile performance score from 4 to 80 by leveraging the latest Angular features and optimizations.
- Managed diverse codebases: Maintained and developed codebases incorporating a variety of technologies, including Vanilla JavaScript, React, and jQuery.
- Developed a custom form solution: Created a custom HTML form and integrated it with the Google Form API to directly submit values to Google Sheets for seamless data management.

Stacks: *Angular, TypeScript, RxJS, Angular Universal (SSR), Taiga UI, PrimeNG, PrimeFlex, Storybook, @angular/localize, ngx-translate, Express.js, Keycloak, Karma, Prettier*

Full-Time, — Frontend Developer

ComRec Solutions Mar 2021 - Feb 2024

- Developed and maintained features in the core medical application, enhancing functionality and user experience for healthcare professionals.
- Upgraded Angular versions to ensure the application remained current with the latest features and security updates.
- Migrated the codebase from SVN to GitHub, streamlining version control and collaboration processes.
- Created reusable CSS components, adhering to best practices to ensure consistency and maintainability across the application.
- Built a dynamic reporting tool, enabling non-front-end developers to create new components easily and maintain best practices.
- Refactored legacy code to improve performance, readability, and maintainability.
- Developed a custom patient dashboard using Chart.js, allowing doctors to monitor patient status visually and efficiently.
- Implemented a feature for doctors to manage their subscriptions, improving the user experience and operational efficiency.
- Built a text edit component using Summernote, enabling doctors to create,

Github
NGRX
TailWind CSS

LANGUAGES

Arabic native
English fluent

- save, and reuse detailed reports about patient investigations.
- Designed and customized components using ng-select to meet specific business requirements.
- Developed Revenue and Volume analytics by service, helping the organization monitor financial performance and make informed decisions.
- Created a stepper form for fast and accurate patient condition descriptions, streamlining the data entry process for healthcare providers.
- Assisted in laying the foundation for a design system, ensuring a cohesive and scalable approach to UI/UX design.
-
- Provided support in refactoring old, unsupported code, improving the overall quality and maintainability of the application.

Stacks: *Angular, Typescript, Bootstrap, Chart.js, Summernote, CSS, Sass, GitHub*

Full-Time — Frontend Developer

Dinexpos Feb 2020 - Mar 2021

- Developed and implemented well-designed, user-friendly features for a Point of Sale (POS) system using Angular and Bootstrap.
- Created and maintained modules such as Inventory Management, Dine-In Management, Order Tracking, and Application Settings to enhance the functionality and efficiency of the POS system.
- Designed intuitive interfaces that improved user experience and streamlined operations for restaurant staff and management.
- Collaborated with back-end developers to integrate APIs and ensure seamless data flow between front-end and back-end systems.
- Conducted thorough testing and debugging to ensure the reliability and performance of the application across different devices and browsers.
- Utilized version control systems like Git to manage code changes and coordinate with the development team.
- Kept up to date with the latest industry trends and technologies to implement best practices in web development.

Stacks: *Angular, TypeScript, RxJS, NgRx, Bootstrap 5, Sass (SCSS), ngx-translate, ApexCharts, Sentry, ESLint & Prettier*
